

## Color Counter Camera with 6mm Lens & 24V AC Line Locked Operation

The Latest Innovation for Facial Recognition

### TC-23

#### Features:

The Counter Camera allows you to view a person's face by placing an unobtrusive camera at eye level. Pictures of the top of your customers head or hat are a thing of the past. Our color camera operates on 24V AC power which allows for line lock and "drift free" color pictures. The base allows for easy horizontal angle adjustment and the camera location inside the housing can be tilted. The cable is located through the base for a more concealed and secure installation. Room for an advertising panel.
